You and your company are hereby informed that the Public Health Trust has initiated a single use device (SUD) reprocessing program with Stryker Sustainability. The decision was made after careful consideration of scientific data and regulations, the safety record of the third-party reprocessing industry and the dramatic reduction in supply costs.

As a partner in our efforts to support the Trust's goal of providing excellent healthcare, your assistance is anticipated and expected as we move on with this initiative. The Trust's administrations as well as the physicians are in full support.

Facts:

1. In June 2000, a report by the General Accounting Office (GAO) stated, “CDC experts said they were not aware of patient illnesses caused by SUD reuse in the last decade.” In the years since, the FDA has developed and implemented a heightened program of oversight of reprocessing by increasing inspections of preprocessors and hospitals.

2. With FDA guidelines and the MDUFMA Act of 2002, reprocessing is now codified in Federal Law and there is arguably more government regulatory oversight to ensure the safety and effectiveness of reprocessing devices labeled by the manufacturer as “single-use” than almost any other type of medical device used on patients.

3. Because FDA requires the filing of scientific cleaning and sterilization validation data prior to allowing a reprocess or to process any device, one can make a strong justification that there is a greater level of assurance that reprocessed single-use devices are not only clean and sterile and will not place patients in harm’s way, but their use could even reduce the risk to patients from malfunctioning products, which happens frequently with new devices.

4. Stryker Sustainability, the Public Health Trust’s selected vendor, has been inspected by the FDA and has not received any deficiencies. Furthermore, Stryker Sustainability has received all appropriate 510K documentation for reprocessing medical devices that we have chosen to include in the initiative.

In order to meet our goals for success with this program, the Public Health Trust’s expectations of you and your company are as follows:

1. Do not speak negatively to any physician, nurse or employee about SUD reprocessing while on the grounds.

2. Do not distribute any negative materials about SUD reprocessing while on the hospital grounds.

3. These include verbal, written, email or any other way of communication.

Any violation can result in your immediate and permanent expulsion from the facilities and trigger a reevaluation of products purchased from your company. If you have any questions about the intent of this notice please contact Supply Chain Management immediately. We appreciate your understanding of our need to control costs and provide superior care, and look forward to you and your company’s support of this initiative.
